Portable Defragger Crack + Keygen Full Version

KeyMacro is a handy macro recorder that enables you to record hotkeys (mouse and keyboard) which can be called and edited later. You can save them to a file, or directly use them to create a macro. In addition, you can group hotkeys into blocks for easier and faster macro creation.

KEYMACRO Installation: KeyMacro is bundled with the program, but it's easy to uninstall if you need. All you have to do is unzip the package, double-click the file and follow the installation instructions.

KEYMACRO Features: KeyMacro allows you to record hotkeys without any external software. The program records the current mouse and keyboard activity in real time and saves it as an EXE file. All hotkeys can be called later and edited by simply double-clicking the recorded file. You can save it to an EXE file for quicker use, edit it or delete it. Each hotkey block can be automatically copied and re-sized, which makes it easy to create macro with different hotkeys. As you can see, the program can record hotkeys from all active windows. It is not limited to one application. KeyMacro offers many other features, like:

- ☑ Floating window hotkeys (the window is displayed over the current window, but it doesn't obstruct it).
- ☑ Hotkey jump (for quicker use).
- ☑ Hotkey transition (the current application is transitioned to another).
- ☑ Hotkey change (the current application is changed to another).
- ☑ Capturing your entire desktop.
- ☑ Capturing any window (even on another desktop).
- ☑ Recording any action.
- ☑ Recording any file or folder.
- ☑ Changing the size of the hotkey.
- ☑ Printing the hotkeys to a file.
- ☑ Undoing the last hotkey.
- ☑ Up to 10 hotkeys per line.
- ☑ Hotkey re-size (for bigger hotkeys).
- ☑ Hotkey jump (for quick hotkeys).
- ☑ Hotkey transition (for quick hotkeys).
- ☑ Hotkey change (for quick hotkeys).
- ☑ Automatic hotkey re-size (for quicker hotkeys).
- ☑ Memory capture (for quicker and more easy capture).

DefragManager is a defragmentation tool designed for the Windows operating system. It automatically defragments your hard drive, freeing up hard disk space and speeding up your computer. DefragManager runs in the background and takes care of the defragmentation tasks without interrupting your work. It works by consolidating files and data into a contiguous section of the hard drive that is more easily scanned and read. Files and data that are highly fragmented can take up more disk space. DefragManager defragments files and data as they are saved, eliminating disk fragmentation and improving system performance. Note:

DefragManager is required to defragment the entire drive. DefragManager will not defragment a specific folder. The program will defragment files and data in the root folder of the C:, D: drive. Features: - Complete defragmentation of the hard drive - Defragmenting to the end of the drive - Waking up the computer or not after defragmentation - Scheduling defragmentation operations - Configuration of each operation. - User-friendly interface - Compression and decompression of files - Scheduling operations - Ability to exclude items from defragmentation - Ability to exclude folders from defragmentation - Free space graph - Automatically shows the hot files - Automatically shows the free space - Shortcut to the option that shows the fragments - Shortcut to the option that shows the most fragmented files - Control panel, which shows the option to exit - Ability to edit the Registry to add and remove files and folders - Ability to hide the window for the hot files - Abort the defragmentation task - Ability to cancel a scheduled task - Ability to not wait for the computer to shut down after the defragmentation is finished - Program has an online help - Ability to show the program in the tray - Ability to hide the program from the tray - Ability to show the program in the tray when the user is logged in - Ability to show the program in the tray when the user is not logged in - Ability to make the program show the program in the tray when the user logs in or out - Ability to close the program on the screen - Ability to close the program when the mouse pointer is moved to the tray icon - Ability to open the program in the tray - Ability to open the program when the user logs in or out - Ability to open the program when the user clicks the program icon in the tray - Ability to change the program icon in the tray - Ability to change the program icon in the tray - Ability to install a shortcut to
